Reconstitution: 2–4 cc normal saline

Recommended Delivery: IV in 250 mL normal saline bag

High-potency cord blood exosomes
Designed for systemic or IV infusion
Research-grade, high-yield purity

Discover the Science:

Through extensive research and development, Nuvexa 90 blends the perfect fusion of science and nature. We start with umbilical cord-derived exosomes, known for their exceptional potency in Placental, Vascular Endothelial, and Transforming growth factors. This unique a cellular formulation of growth factors, exclusive to Nuvexa 90, creates application flexibility unrivaled by other products.

Nuvexa 90: Convenience Meets Potency

Nuvexa 90 is a shelf-stable product that requires no refrigeration. Our lyophilization process dehydrates without denaturing the crucial peptides, proteins, and growth factors essential for collagen-based healing. This means you can safely apply Nuvexa 90 based on patients needs.

Transparency and Trust:

We proudly disclose all Nuvexa 90 ingredients, and package our product in transparent glass vials. We believe in the power of clearly seeing the purity of our products. And we guarantee that you'll be astonished by the results your clients are about to experience!
