

# GHK-CU

- High-Potency Regenerative Copper Peptide

## JOIN THE NUVEXA REGENERATIVE EVOLUTION!

GHK-Cu delivers a higher-potency copper peptide formulation designed for advanced investigational regenerative and wellness-focused peptide protocols.

### Product Information

**Product:** GHK-Cu 100mg

**SKU:** GHKCU100

**Dose:** 100mg

**Description:** Lyophilized copper peptide powder in sterile vial

**Reconstitution:** Bacteriostatic water recommended

**Recommended Delivery:**

- Research applications only
- High-purity regenerative peptide formula
- Professionally prepared sterile vial
- Designed for advanced rejuvenation research

### Discover the Science

Researchers continue exploring GHK-Cu for applications involving collagen wellness, regenerative support, and skin-focused peptide pathways.

### Potency Meets Stability

Our lyophilized preparation process helps maintain peptide consistency and product integrity for professional use.

### Transparency and Trust

Nuvexa formulations are built around transparency, consistency, and research-focused innovation.
