

IGF-1 LR3

- Advanced Growth & Recovery Peptide

JOIN THE NUVEXA PERFORMANCE EVOLUTION!

IGF-1 LR3 is a research-grade peptide designed for investigational applications involving recovery support, performance-focused wellness, and advanced growth pathway research.

Product Information

Product: IGF-1 LR3 1mg

SKU: IGF1LR3

Dose: 1mg

Description: Lyophilized peptide powder in sterile vial

Reconstitution: Bacteriostatic water recommended

Recommended Delivery:

- Research applications only
 - Research-grade performance peptide
 - Designed for recovery-focused protocols
- Professionally prepared sterile formulation

Discover the Science

IGF-1 LR3 is being researched for its relationship to growth signaling pathways, recovery support, and performance-focused peptide applications.

Stability and Performance

The lyophilized preparation process supports peptide integrity while providing professional-grade consistency and handling.

Transparency and Trust

Nuvexa formulations are built on transparency, quality assurance, and research-focused peptide innovation.
