

RETATRUTIDE

- High-Potency Metabolic Peptide Formula

JOIN THE NUVEXA METABOLIC EVOLUTION!

Retatrutide delivers a higher-potency peptide option for advanced metabolic and wellness research applications. Formulated to support investigational pathways tied to appetite response, glucose metabolism, and energy utilization, this formulation is designed for professionals seeking enhanced flexibility in peptide protocols.

Product Information

Product: Retatrutide 60mg

SKU: RETA60

Dose: 60mg

Description: Lyophilized Retatrutide peptide powder in sterile vial

Reconstitution: Bacteriostatic water recommended

Recommended Delivery:

- Research and investigational applications only
- Research-grade peptide purity
- High-yield peptide concentration
- Sterile and professionally prepared formulation

Discover the Science

Retatrutide is being studied for its unique ability to target multiple metabolic pathways simultaneously. Researchers continue exploring its role in metabolic optimization, appetite regulation, and body composition support.

Convenience Meets Potency

The 60mg formulation provides greater dosing flexibility for advanced peptide applications. Lyophilization helps preserve structural integrity while supporting extended product stability.

Transparency and Trust

Nuvexa products are prepared with transparency and consistency in mind. Every formulation reflects our commitment to research-focused innovation and professional-grade peptide quality.
