

TIRZEPATIDE

- High-Potency Metabolic Research Formula

JOIN THE NUVEXA WELLNESS REVOLUTION!

Tirzepatide provides a higher-concentration peptide option designed for advanced investigational metabolic applications. This premium formulation supports on going peptide research focused on metabolic balance, appetite pathways, and wellness optimization.

Product Information

Product: Tirzepatide 30mg

SKU: TIRZ30

Dose: 30mg

Description: Lyophilized Tirzepatide peptide powder in sterile vial

Reconstitution: Bacteriostatic water recommended

Recommended Delivery:

- Research applications only
- High-purity peptide formulation
- Research-grade sterile preparation
- Designed for metabolic pathway research

Discover the Science

Tirzepatide continues to gain attention in the peptide industry for its investigational support in metabolic function and appetite management. Researchers are exploring its potential role in wellness optimization and body composition support.

Precision and Stability

Our lyophilized preparation process is designed to maintain peptide integrity while allowing for stable storage and professional handling.

Transparency and Trust

Nuvexa is committed to purity, transparency, and consistency. Every vial is professionally prepared to support high-quality peptide research and development.
